ASTM Standards

Standards:

Classifications ..	93
Guides	1175
Practices	2092
Specifications ...	3274
Terminology	237
Test Methods ...	5474
<i>Total</i>	12345

Each ASTM standard has a unique serial designation. It is comprised of a capital letter indicating general classification (A, ferrous metals; B, nonferrous metals; C, cementitious, ceramic, concrete, and masonry materials; D, miscellaneous materials; E, miscellaneous subjects; F, materials for specific applications; G, corrosion, deterioration, and degradation of materials; ES, emergency standards; P, proposals; PS, provisional standards), a serial number (one to four digits), a dash, and the year of issue.

In each serial designation, the number following the dash indicates the year of original adoption as standard or, in the case of revision, the year of last revision. Thus, standards adopted or revised during the year 2010 have as their final number, 10. A letter following this number indicates more than one revision during that year, that is 10a indicates the second revision in 2010, 10b the third revision, etc. Standards that have been reapproved without change are indicated by the year of last reapproval in parentheses as part of the designation number, for example, (2010). A superscript epsilon indicates an editorial change since the last revision or reapproval; $\epsilon 1$ for the first change, $\epsilon 2$ for the second, etc.

If a standard is written in acceptable metric units and has a companion standard written in inch-pound units (or other units), the metric standard is identified by a letter M after the serial number; this standard contains "hard metric" units.

If a standard is written in inch-pound units (or other units) and acceptable metric units, the document is identified by a dual alphanumeric designation.

When reference is made to a standard, the *complete* designation should be given. Best practice is to state the *designation and title*.

The boldface number(s) following the title refer to the volume(s) of the *Annual Book of ASTM Standards* in which the standard appears.

This list includes only those standards which appear in the 2010 edition of each volume of the *Annual Book of ASTM Standards*. New and revised standards that were approved after the closing date for the volume are available as separate reprints and will be listed in next year's edition.

Each ASTM standard is available as a separate reprint from ASTM. Price and order information are available from ASTM Customer Service, 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959, 610-832-9585.
